

Policy Document

COSHH Management Policy

GSFM Facilities Ltd takes the health and safety of its staff and customers very seriously and we fully comply with all COSHH requirements and regulations.

We limit the number of chemicals to those that are only essential for our duties, and these are carefully selected considering the welfare of our staff, your stores, and the environment.

Every location we serve is provided with up to date COSHH sheets for all products in supply and these are accompanied by Risk Assessments, Method Statements and MSDS

As part of training programmes, we will work closely with our chemical supplier to ensure that the most appropriate products are supplied to stores and that each site receives the most up to date and paperwork available to ensure your legislative compliance.

All Cleaning staff are fully trained to safely use the chemicals at your stores and records are strictly held on site to confirm such training has been carried out.

Please refer to the following detailed information sheets:

- Individual COSHH sheets
- Risk Assessment sheets
- Method Statements
- MSDS
